Opis produktu

The Supertech Shoe boasts a new, fully knitted upper construction which is designed to deliver the closest and most comfortable fit, adapting to the morphology of the feet even more, and resulting in improved comfort in the cockpit and reduced driver fatigue. The ultra-lightweight Supertech Shoes feature a full carbon heel cup for a secure heel lockdown and holding the foot firmly in place. The shoes have a 3D printed midsole, manufactured using Digital Light Synthesis, this allows increased cushioning in key areas, softer under the heel bone, but stiffer at the edges for maximum stability. The memory foam heel padding reduces vibrations from being transmitted to the heel and reduces discomfort, whilst the ultra-thin rubber outsole gives the driving feel required for maximum performance. KEY FEATURES: Ultra-lightweight, knitted upper offers superior driver comfort in forefoot. Thermo-formed carbon heel cup provides secure heel lockdown. 3D printed midsole offers premium soft cushioning, whilst retaining maximum stability.

Produkt posiada dodatkowe opcje:
